

A BACK FOR THE FUTURE

Each day we produce upwards of 180.000 meals. It is strenuous work and so we do what we can to ease the burden for our team here at Frankenberg.

To support this we recently initiated a cooperation between ourselves, our regional governmental Health & Safety Department and a consortium of Health Insurance providers to organise a mobile Back Health Clinic to visit the plant for 2 weeks.

The Mobile Clinic comes complete with sophisticated equipment to diagnose any potential back related issues, a team of clinicians to discuss and advise individuals on best practice to avoid injury, workouts and other specialised advice to maintain a healthy and injury-free life.

60 of our team took advantage of this and reaction was so positive that we have initiated the program to repeat as soon as possible for more of our team to benefit from.
